Initial Model Training Code, Model Validation and Evaluation Report

The initial model training code will be showcased in the future through a screenshot. The model validation and evaluation report will include classification reports, accuracy, and confusion matrices for multiple models, presented through respective screenshots.

Initial Model Training Code:

```

from sklearn.metrics import mean_absolute_error, mean_squared_error, r2_score

def linear_regression(X_train, X_test, y_train, y_test):
    lr = LinearRegression()
    lr.fit(X_train, y_train)
    y_pred = lr.predict(X_test)
    print("**Linear Regression**")
    print("Mean Absolute Error: ", mean_absolute_error(y_test, y_pred))
    print("Mean Squared Error: ", mean_squared_error(y_test, y_pred))
